

Ring Sizing Chart

Measuring your finger

1. Wrap a piece of string or paper strip around the base of your finger.

2. Mark the string or paper where it overlaps to form a complete circle.

3. Measure the length of the section of string or paper where it overlaps around the finger.

4. Compare your measurement with this chart to determine your ring size.

5. Please note: You need to take the knuckle into consideration when sizing. The base of your finger may be smaller than your knuckle. Also wider bands should be sized $\frac{1}{2}$ -1 size larger.

To get your girlfriends ring size, ask to clean her rings the next time in the mall. Most jewelry stores will do it for free. Then you can secretly ask the sales person to check the size for you. Or you can slip her ring on your finger and mark the spot it fits. Then measure that spot with the directions above.
